Kolindale is renowned for producing a well structured, plain bodied Merino with wool of high quality and cutting ability. Emphasis is placed on breeding a robust, quick maturing and fertile animal that produces white and lustrous, well-nourished, crimply medium wool.

Favourable commercial characteristics are maximised and even lines are produced through the use of artificial insemination on 1000 elite ewes. Identifying top ewes and lambs at weaning has enabled the introduction of an embryo transfer program to increase stock profitability through genetic gain.

**LEWISDALE BLOODLINE CONSISTS OF
1700 MERINO AND POLL MERINO STUD EWES,
500 OF WHICH FORM PART OF OUR AI PROGRAM
EACH YEAR TO PRODUCE SUPERB SALE RAMS.**

Renowned for a plain, large frame, these Merinos produce a heavy cut of white crimped wool. These quick maturing, easy care animals achieve early marketability with high body mass.

In 2011/12 top stud ewes were purchased at the Lewisdale Dispersal Sales with the aim of continuing to produce a straight Lewisdale bloodline type of breeding. In keeping with this intention, Lewisdale bloodline is also run on a separate property to Kolindale.
